TO THE YUKON LEGISLATIVE ASSEMBLY:

This petition of the undersigned shows:

THAT

WHEREAS the Yukon is now one of the only regions in North America that remains uncontaminated by Genetically Engineered (GE) crops; and

WHEREAS it is very likely that GE crops, once planted, would cause irreversible harm to our natural ecosystems and sustainable farms; and

WHEREAS there is currently no legislation preventing the planting of GE crops in the Yukon,

THEREFORE

We the undersigned ask the Yukon Legislative Assembly to put in place a ten year moratorium on the planting of any GE seed in the Yukon.

Please sign only once.
